

# Amadis

Masă de operații, un susținător puternic în sala de operații

# Intuitive Wireless Connectivity

## Smart Wireless Hand Control

The Amadis hand control uses Bluetooth wireless technology, allowing medical staff members to operate it anywhere in the OR, even outside of the sterile area. It also helps reduce exposure to C-Arm radiation.

## Simple User Interface

Easy-to-read buttons provide all kinds of tabletop movements. The icons on the backlit keypad are intuitive and easy to understand, even in darkened ORs. Multi-language options are also available for selective countries.

## Safety Design

The hand control automatically deactivates after 70 seconds when no in use. Wake up function is easily activated at the touch of a single button on the keypad.

## High Speed Power Charging

One single charge of the ergonomic wireless hand control can last up to xx hours of operation time. It automatically recharges when plugged into the cable.

## Tablet Position Memory

This intelligent function memorizes operating position under each surgeon's name. It allows precise angle with the touch of a single button for quick and easy set up.

## Tablet Built-in Diagnostic

The diagnostic function helps medical staff to easily identify the root causes of the displayed error codes and allows for quick responses on maintenance time.

## Full Mobility for Relocation

Working with four swivel casters and a motorized drive wheel, the Amadis table facilitates smooth and efficient movement between ORs and recovery rooms.

It also allows the Amadis to make a 360° rotation. It can relocate within the OR, which reduces preparing time for various surgeries and maximizes the OR utilization.

## Modularity Equals Flexibility

Models	Tabletop	Motorized Drive Wheel
Amadis	4 sections, 5 pieces	
Amadis /M	4 sections, 5 pieces	V
Amadis PLUS	6 sections, 8 pieces	
Amadis PLUS/M	6 sections, 8 pieces	V

The Amadis series is built for versatility and to support complicated surgical procedures. There are four Amadis models to choose from, depending on the needs of surgical subjects and hospital conditions.

# Module Connectivity- Soft and Easy Connection

All the Amadis detachable modules are quickly and safely connected by an innovative one-button quick-release technology and can be easily assembled or disassembled by a medical staff member.

Manually adjustable handles provide convenience in setting positions. All the manually adjustable joints have a locking mechanism on the adjustable handle to ensure that no accidental from position can occur at any time.

The leg sections can open up to 90° on either side, separately or simultaneously, allowing the surgeon to find the best patient position to access the optimal operating field.

▲ One-button quick-release technology

▲ Head section can be raised or lowered up to 60°

▲ Special head section design for lateral positioning

◀ Adjustable handle with a locking mechanism

# Fulfills Multiple Surgical Applications

## Technical Specifications

Table Length* Width (Amadis, Amadis /M)	2193*530mm
Table Length* Width (Amadis PLUS, Amadis PLUS/M)	2267*530mm
Table Height (Without Mattress)	660 ~ 1210 mm
Trendelenburg / Reverse Trendelenburg	45° / 45°
Lateral Tilt (L / R)	35° / 35°
Head (Up/ Down)	60° / 60°
Shoulder (Up / Down)(Amadis PLUS, Amadis PLUS/M)	90° / 45°
Back (Up / Down)	90° / 52°
Leg (Up / Down / Open)	90° / 90° / 0° ~ 180°
Longitudinal Sliding (Head / Foot)	250mm / 250mm
Flex / Reflex (Normal)	210° / 145°
Weight Capacity	454 kg / 1000 lbs
Weight Capacity (Include table articulation and sliding)	273 kg / 600 lbs
